# Ways to build strong relationships (5)

# **Patience**

We need to be patient and show an individual we're there in their best interest, and it may take a long time for them to believe that to be true.

# **Body language**

Our body language communicates so much of what we think and feel. We can reflect the care we have for an individual and show we want to be with them.

## **Puzzle-solve**

Experiences drive feelings. Our role is that of a detective, piecing together clues and information to gain a better understanding of an individual's perspective.

# **Be inclusive**

The best support is done WITH someone rather than TO them. Involve an individual in support plans and decision making and make sure everything is accessible.

### Conversations

Sometimes during a busy day, it's hard to stop and actively listen to those we support, but these small conversations can make all the difference.
